

PS900

PS900 Upright Bike

LOOKS GREAT...LASTS LONG

The PS900 upright bike is built on a custom-designed, racetrack-inspired steel frame that is a perfect complement to any exercise facility, especially when combined with the other cardio pieces in the PS series. TRUE® uses the most durable materials available in this class. And with a machine weight of 120 lbs (54 kg) - the PS900 will look good for the long haul.

SELF-POWERED

The PS900 bike is self-generating and therefore can be placed anywhere in your facility. The 2 stage drive system with Poly-V belts combine for a very smooth and quiet riding experience.

SEE THE DIFFERENCE

TRUE uses logical control panels and a 16 character cool blue LED screen that is easy to read and understand, so your users can "get on and get going" with their workout. Programming on the fly allows users to adjust workout settings while using the bike.

PRE-PROGRAMMED WORKOUTS

Six pre-programmed workouts including manual, quick start, random, cardio, fat burn and hills provide a variety of training options for users with a wide range of abilities and goals. The PS900 features a comfortable, padded seat with 15 height settings that can be adjusted to correctly fit most users. Aero bars provide added comfort and leverage for long distance workouts.

TRUE HRC (HEART RATE CONTROL)®

The PS900 is equipped with a contact heart rate monitoring system as well as a wireless telemetry system, both of which assist users in maintaining their optimum heart rate and maximizing their workout results. The HRC Cruise Control™ function allows users to "lock in" on a specific target heart rate. One touch Cruise Control will automatically adjust speed and incline throughout the duration of a workout to maintain the target heart rate.

BUILT TO LAST

TRUE's PS900 offers one of the most comprehensive warranties in the industry: a lifetime frame warranty, five years on parts and one year labor coverage. At TRUE we stand behind our products, so you can enjoy years of worry free service.

PS900

Specifications

Drive System

Power Source	Self-Generating
Drive System	Dual Stage Drive System with Poly-V Belts
Crank	One Piece Forged Steel Crank System With Sealed Bearings
Resistance Source	Hybrid Self-Generating Brake

Frame

Frame	Robotically Welded Heavy-Duty Tubular Steel
Finish	Powder Coat
