

Revmaster Sport FEATURES

Belt

The RevMaster Sport uses a smooth Kevlar belt instead of a chain. The result - a smooth and QUIET!! ride. Our belt never needs to be replaced due to stretch, or oiled like the chain bikes do.

Brake and Resistance

Designed for ease of use, the resistance knob adjusts easily. Just turn the knob to adjust (increase or decrease) the intensity of your workout. By simply pressing down on the same knob, the braking system activates quickly and safely. Micro turn adjustment allows smooth, safe transitions to higher intensity levels.

Cranks

Designed to withstand greater force loads than conventional bikes, the LeMond RevMaster Sport features an exceptionally strong custom BMX bottom bracket and cranks for exceptional product durability.

Flywheel

Drop in mounting - easy service, no adjustments ever needed, easy to reach high RPMs with less "runaway" feeling and safe for knees.

Frame

This frame is more stable and allows fast, easy access to all seat, handlebar & height adjustments. This creates a comfortable, high performance custom fit for all users! Steel main frame undergoes a 17-step rust inhibitor process prior to durable powder coat process.

Classic Handlebars (not original style handlebars)

Traditional handlebar design which allows multiple hand positions and ease of use - does not accept Lemond RevMaster Pilot.

Micro-Adjust Fit

No more holes limiting adjustment options! Height and fore/aft measurement ruler marks allow for quick adjustments for a proper fit every time.

Saddle

Anatomically designed, ultra comfortable saddle, that provides proper support for indoor workouts.

Saddle Adjustment

The numbered dual position seat slider for fore/aft fit provides more than enough range to properly fit almost any person, regardless of height. Suggestion: A taller person may want to use the front hole of the slider, which enables this saddle to be moved further back.

Transport Wheels

Designed for easy transport! A rock-solid construction and the extra-wide base ensure outstanding stability.

V-Clamp

Unique V-clamp and rotated tube design for enhanced stability.

Water Bottle Holder

Water-bottle holder is mounted to the handlebars allowing you to take a drink without disrupting your exercise form.

SPECIFICATIONS

Height: 38" (97 cm)

Length: 41.5" (105 cm)

Width: 22.25" (48 cm)

Weight: 110 lbs. (50 kg)

Maximum User Weight: 300 lbs.

The RevMaster frame is made using a 17 step manufacturing process for quality and durability.
